

ANDREA ELENA FEBRES MEDINA

UX/UI and Digital Designer specializing in complex digital systems, data visualization, and editorial platforms. My work focuses on designing clear, durable structures for enterprise, cultural, and research contexts, combining information architecture, visual systems, and user-centered design. I have experience working both independently and within multidisciplinary teams on long-term projects.

Freelance

Digital Designer & Data Visualization Designer

Worked on digital platforms, editorial systems, and data visualization projects for cultural institutions, research groups, and organizations. Projects ranged from interactive services and content-heavy websites to editorial and cartographic data visualizations, often developed in collaboration with design studios and research teams.

03/2020 — 03/2025
Milan

Superforma srl

Partner and Digital Designer

As a partner, I contributed to the growth of Superforma as a hybrid digital and physical entity. I designed and developed the website, defined the visual identity and digital communication, and contributed to the organization of workshops and public events. The role involved long-term system thinking, platform evolution, and coordination across digital, educational, and fabrication activities.
